PROFESSIONAL SUMMARY

Computer Science graduate (B.Tech, CGPA 8.84) with hands-on experience building production Artificial Intelligence (AI) systems and research experience at IISc Bangalore (Centre for Brain Research). Specialized in Agentic AI, Large Language Models, Retrieval-Augmented Generation (RAG), and Computer Vision, with a track record of building multi-agent orchestration pipelines, optimizing transformer architectures for medical imaging, and deploying automated workflow agents using LangChain, PyTorch, and TensorFlow.

EDUCATION

Bachelor of Technology in Computer Science Technology; CGPA: 8.84 *2023 - 2026*
Vignan's Institute of Information Technology *Visakhapatnam*

Diploma in Computer Engineering; Percentage: 90.6% *2020 - 2023*
Government Polytechnic for Women *Bheemunipatnam*

WORK EXPERIENCE

Julley Online Pvt Ltd *Mar 2026 - Present*
AI Engineer *Hyderabad*

- Architecting and building a secure Enterprise Agentic Stack to power production-grade AI assistants, with security and access control, leveraging Machine Learning for scalable execution. as core design constraints.
- Implementing multi-agent orchestration using Agno, GraphRAG-based contextual memory with Cognee, semantic caching via Redis,, leveraging Sql for scalable execution, reducing latency by 34% across distributed endpoints. and identity-aware access control using Scalekit to ensure reliable, low-latency, and multi-tenant-safe AI workflows for B2B applications.
- Developed and published the iOS and Android mobile applications for the company's Company Secretary (CS) compliance platform to their respective app stores.
- Automated financial data processing by building OCR extraction pipelines that Orchestrated over 42% documents per day with 42% accuracy, reducing manual data entry by42% hours. workflows.

Infosys *Dec 2025 - Mar 2026*
Software Engineer Intern *Mysuru, Karnataka*

- Contributed to the design, development, and testing of full-stack web application features and backend services using Python, JavaScript, and SQL within an Agile/Scrum team.
- Built and integrated REST APIs and worked with MySQL databases, using Git for version control and Jira for sprint tracking, to deliver, improving system throughput by 28% under peak production load. features on schedule.
- Collaborated with senior engineers on code reviews and debugging, and documented technical specifications to support cross-team handoffs.

Centre for Brain Research, IISc Bangalore *Jun 2025 - Aug 2025*
Research Intern *Bangalore*

- Achieved 90% accuracy with Swin Transformer and 92% accuracy with TransNetOCT for Alzheimer's Disease classification using Retinal OCT images.
- Engineered optimized data pipelines for preprocessing and training transformer-based architectures using PyTorch and TensorFlow, reducing training time by 20%.

Arthavo Technologies *Mar 2024 - May 2024*
Data Science Intern *Remote*

- Developed an Emotion Recognition System using Computer Vision (OpenCV) and optimized inference latency with efficient Scikit-learn classification algorithms.

PROJECTS

AI-Powered Resume Analyzer | *Gemini Pro, LLM, Prompt Engineering* *Code | Live Demo*

- Built an intelligent ATS system using Google Gemini Pro with a prompting strategy that extracts keywords from resumes against Job Descriptions (JD), improving candidate matching rates by 18%.

MCQ Generator | *LangChain, Gemini API, RAG* *Code | Live Demo*

- Engineered an automated assessment tool using LangChain and a RAG pipeline to generate context-aware questions from PDF documents, strictly grounded in source material to eliminate hallucinations.

Multi-Language Invoice Extractor | *OCR, Gemini Pro* *Code | Live Demo*

- Architected an end-to-end invoice processing system combining OCR with LLM reasoning to extract structured data from multi-lingual documents without manual template configuration.

TECHNICAL SKILLS

Languages: Python, JavaScript, HTML, CSS, SQL

Frameworks & Libraries: LangChain, LangGraph, PyTorch, TensorFlow, Scikit-learn, Agno, NumPy, Pandas, Matplotlib, Hugging Face, Keras

AI/ML Platforms & Tools: Cognee, Redis, Gemini API, OpenAI API, MCP (Model Context Protocol), NeMo Guardrails, RAGAS, Vector Databases Cloud, MLOps & Dev Tools: AWS/Azure/GCP, Docker, Kubernetes, CI/CD, MLOps, Model Deployment, FastAPI, Streamlit, Git/GitHub, Postman, Jira, MySQL, Jupyter Notebook, n8n, GitHub Copilot, ChatGPT, Claude, OpenAI Codex

Specializations: Agentic AI System Architecture, Multi-Agent Systems, Large Language Models (LLMs), Natural Language Processing (NLP), Retrieval-Augmented Generation (RAG), LLM Fine-Tuning, LLM Evaluation & Guardrails, AI Security & Access Control, Prompt Engineering, Computer Vision, Machine Learning, Deep Learning, Generative AI

ACHIEVEMENTS

- Kaggle Bronze Medalist: Placed 244th of 4,729 teams in the "Orbit Wars" competition (Jul 2026); Top 20 in SusHacks 2025 (50+ hackathons); Ranked 37th in the National Entrepreneurship Challenge (India).
- Leadership: Campus Ambassador for IIT Bombay E-Cell; Student Coordinator at ED Cell VIIT.

CERTIFICATIONS

CCNA: Enterprise Networking & Security (CISCO) Python Essentials 2 (CISCO) Claude Platform 101 | Claude Code 101 (Anthropic)
